Inspira Assessment was updated on 5th July 2019

We hope you're all getting ready for your summer vacations. For graders and planners, we spent June focusing on revising the appeals process with more timely email notifications and workflow improvements for shared marks. Graders will also notice we finished the rollout of the new commenting tool. Authors can now have custom sizes for images in their multiple choice questions, and we've made some changes to the beta code compiler question type.

These improvements will be covered in August Release Webinar Tuesday 6th August 13.00 - 13.30 CET. (No release webinar in July).

The Inspira Team

HEADS UP

Welcome to Inspira Seminar 2019 for Higher Education

Oslo. 25. - 26. September.

For registration and details, visit [Seminar 2019 Overview](#)

Join us for a two day deep dive into all things Inspira. We'll be focused on reaping the reward from digitising exams. From reviewing optimal change management to the nuts and bolts of getting your exam operations optimised for scale, we'll be running sessions to make sure that you are getting the most out of your Inspira installation.

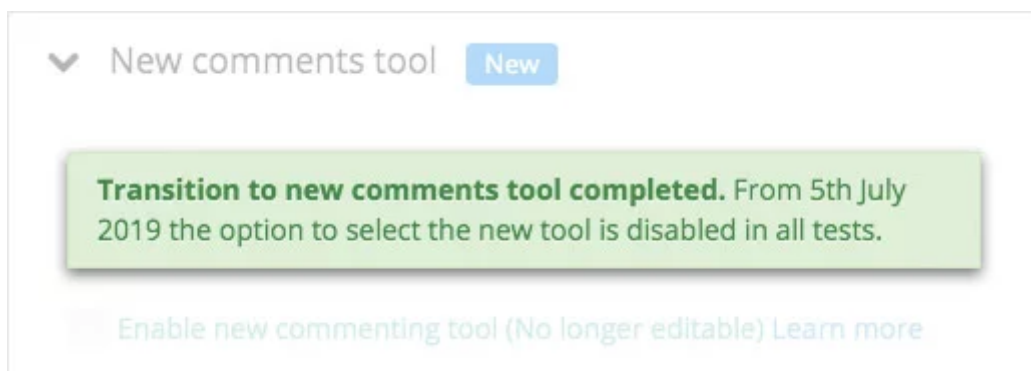

Don't miss this opportunity to meet the Inspira team face to face and get your questions answered. Join in discussions with your fellow Higher Education colleagues and professionals. Administrators and academics will find a wide range of interesting learning opportunities during the two days in Oslo.

The seminar will be a mixture of keynote sessions, breakout sessions, round table discussions, and workshops, where the main purpose is to facilitate participation and sharing of ideas.

We look forward to [seeing you in Oslo!](#)

Transition to new comments tool completed

From 5th July 2019 the option to select the new comments tool is disabled in all tests.

Please note

- All comments created in old tool will still be visible to graders, and to students if the comments are shared

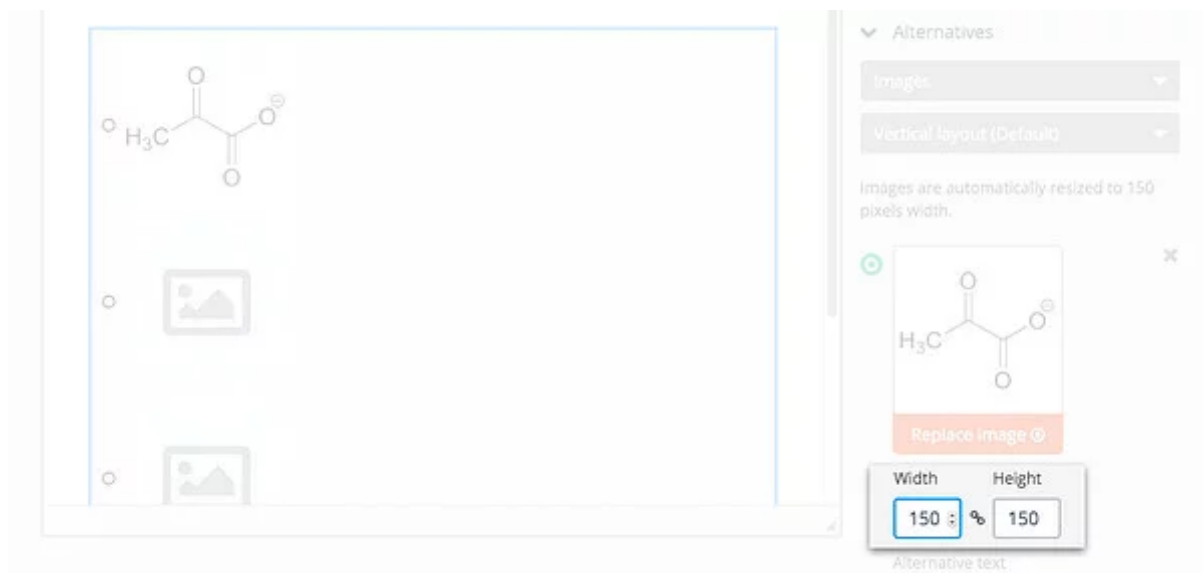

- Tests created before 5th July will continue to use the previously selected version
- All test templates have been automatically updated to use the new tool

Released 5th July 2019

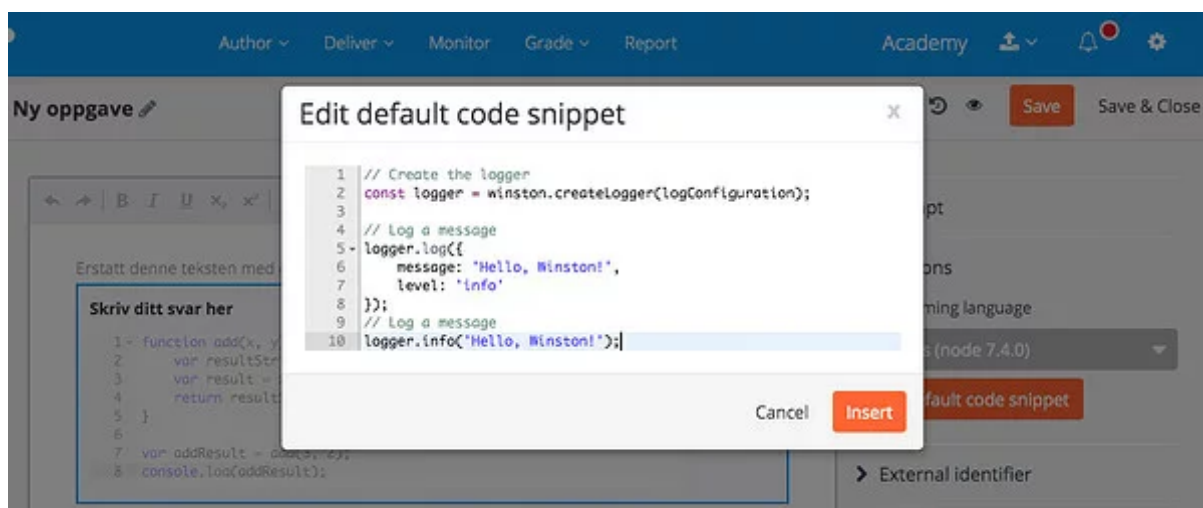

For authors: Custom sizes for images as alternatives in MCQ and MRQ

Images are still automatically resized to 150px width, but author can now set size to minimum 50px and up to 800px width or height.

For authors: Various improvements to the Code Compiler question type **BETA**

- New modal for creating default code snippets
- Added validation and alerts when selecting programming language
- Added language versions to programming language selector
- Fixed issue with evaluation feedback not shown when returning compilation error as result.

Default code snippets allow authors to pre-populate the answer field with example code

For planners: Individual End Time improved

[Individual End Time](#) allows candidates to have separate deadlines. In this release, we have improved the way Latest individual end time is displayed to Planners.

IA1-2375 IDD is finished

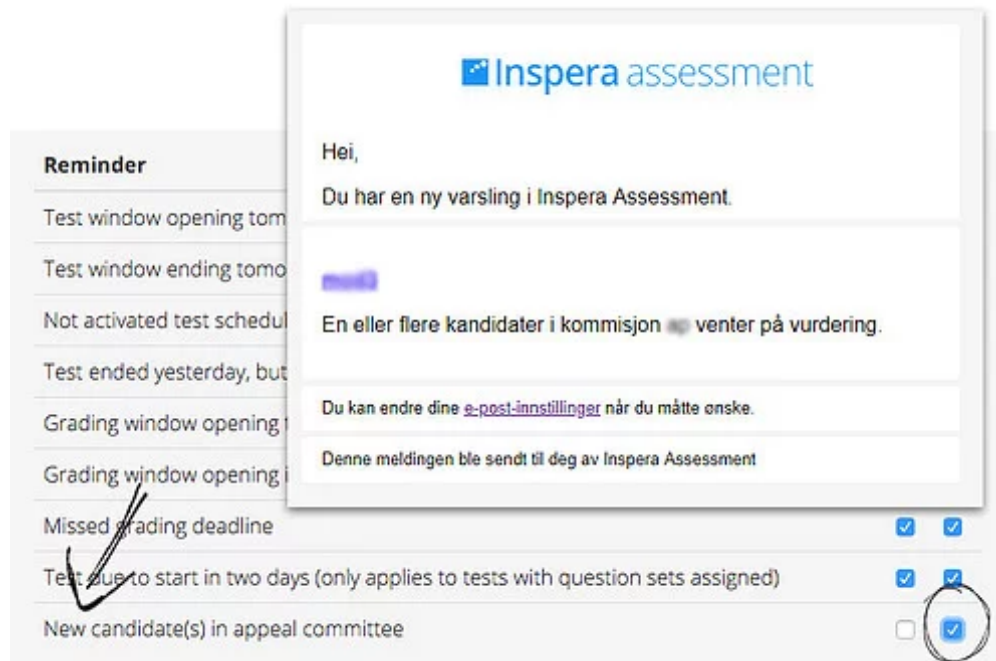

Test opens 27.05.2019 9:30 AM	Standard end time 30.05.2019 12:00 PM Modify Open for late submission	Latest individual deadline 31.05.2019 8:00 AM
---	--	--

Individual end times found. One or more candidates in this test have a custom test end time.

Latest Individual End Time is now visible next to the standard end time.

For graders: Improvements to Appeals

- Fixed issue with marks from previous round shown in appeal round
- Appeal graders are now notified when new candidates are added to their committee

The new email notification is activated for all graders by default.

Other improvements

- Fixed issue with information about FS sync wrongly displaying *Automatic FS-sync is turned off*, also when turned on.

- Fixed issue with updating Question Sets in some cases not updating to latest revision on tests
- Fixed issue with how Duration is rendered in exports.
- Fixed issue with question number is not visible when the section only contains one question
- Improved handling of trailing spaces in Math Working and Math Entry question responses
- Improved responsiveness when adding 10+ additional resources to a Question Set
- Math Entry responses in Print layout: Added border around response to visually separate it better from surrounding text
- Author text editing: Fixed issue with images sometimes wrongly removed when pasting text from word
