Inspira Assessment was updated 3rd July 2020

New features and improvements will be covered in August release webinar.
Have a great summer!

The Inspira Team

Heads up

Changes in SEB version support

In the June release note we reported that support for SEB 2.3 for Windows would end with the August release. Since then we have received requests to postpone this and SEB 2.3 for Windows will now be supported until release *4th September*.

From 3rd July 2020

[SEB 3.0](#) is now the default version for Windows.

Please note the following:

- Audio recording question type is not supported in SEB 3.0
- Because SEB 3.0 does not support the mp4 video format, Inspira automatically converts videos added in this format. Please allow some time

when activating tests containing videos uploaded prior to this release.

[Learn more](#)

From 7th August 2020

Ending support for SEB in MacOS 10.12

Changes in Help Center

- Submitting requests now restricted to pre-registered users only
- New users can be registered by submitting service requests

Inspira Remote Exam

Inspira Remote Exam is now available to beta testers. We are aiming for a general release in August 7th. In June we made further improvements:

- **Pre checks:** Improved face detection for photo identification
- **Usability improvement:** Progress bar to show uploading of content and warning to not close it before uploading
- **Feature:** Added multi session support and support for SEB 3.0 for Windows
- **Security:** Many improvements and enhancements
- **Resilience:** Queuing of blocked processes in case of no internet connection

Released 3rd July 2020

New features and improvements

FS (Norway)

- Individual delivery deadlines are now continuing to sync after test start time
- Grading deadline and appeal grading deadline now updated on synchronisation with FS
- In Marking 2.0, sync settings and sync logs are now available in Options

Languages

- Dutch now supported
- Polish language pack improved
- Fixed issue with Swedish translations related to printing of comments

Author / Log

- It is now possible to preview older revisions of questions and question sets using the new link in log event type *Saved new revision*

Deliver

- Auto-submit: Fixed issue with group exam not always being submitted when extra time ran out
- Fixed issue with planners not being able to modify test end time in activated tests

Monitor

- Fixed issue with special characters sometimes missing in ID's for permanent users

Grading

- Fixed issue with annotation channel selection, where wrong channel would sometimes be selected upon navigation to- and within test
- Fixed issue with planners not being able to cancel appeal round for group exams
- Fixed issue with downloading Mark schemes containing square brackets in the file name
- Annotation channel *All students* now disabled by default

Marking 2.0

- Submission viewer: Added option to Print comments
- List of assigned graders now also available for tests with only one committee, and in tests with multiple graders, but not grouped in committees
- Fixed issue with submissions that had been signed off sometimes still visible in Marking 2.0
- Improved grouping of shortcuts in the Options menu

Login improvements

- Fixed issue with logging in with test codes: First and last name no longer case sensitive
- Improved UX when logging in with wrong account: When admin users now log in as student by mistake, and then try to open one of the admin tools, they will now see a more informative message about what has happened, and how to proceed.

Public demo exams

- Fixed issue with responses not getting cleared between attempts
