HEADS UP

[Safe Exam Browser 2.4](#) for Windows was released on April 4th. This version is now approved for use in Inspira Assessment.

New features and improvements

AUTHOR

Added support for **Threshold level marks** in question types Graphic Gap Match, Inline Gap Match and Graphic Text Entry.

▼ Marks
Threshold levels ▼
 2 levels
 Maximum marks: 5 (3) Edit

From	To	Reward
2	3	5
0	1	3

When previewing question types Graphic Gap Match and Inline Gap Match, authors now have the option to **Show correct answers** to automatically populate gaps with correct tokens.

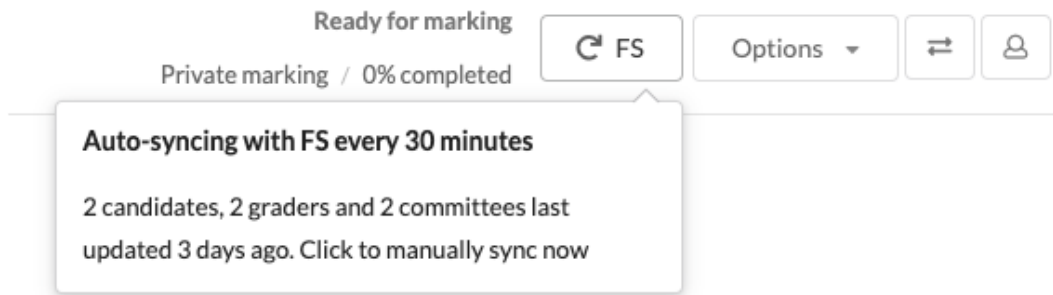

CANDIDATES

Section numbering schemes. Improved information about answer status in sections not currently selected.

- Added a checkmark when all questions are answered
- Added count *Answered of total* when section is not completed

MARKING 2.0

FS and PCG: Support for synchronisation with external systems within Marking 2.0

- Added support for unsharing (Back to private) and unconfirming grades
- Header now includes a pop-up showing the names of the remaining graders that have not yet confirmed as well as their last login time.
- View committee members in committee overlay, including option to resend invites
- Standard workspace scheme will now available in all tests
- Removed the “View all” annotation channel as this *read-only* channel concept caused confusion to some users
- Fixed issue with wrong numbering schemes in private notes inserted into explanation of grades
- Fixed issue with annotation count not updating without refreshing page
- Fixed issue with grading deadline shown in bad format

OTHER IMPROVEMENTS

- **Improved file names for submission exports.** The filename that was previously ‘result_export_{assessmentrunid}_{date}.{ext}’ has been changed to ‘result_export_{jobid}_{assessmentrunid}_{date}.{ext}’. Thus making the filename unique for each export.
- **FS:** Timeframe code added to the list of tests in Delivering, Grading and Reporting.
- **Send messages to 1500 candidates from monitor at once.** We increased in the limit on the number of candidates that can be included in a single batch when sending out messages from 500 to 1500
- Improved support for large PDF exports
