Inspira Assessment was updated on 10th January 2020

No new features are released this time, although we have a lot of exciting new features to be released soon!

We will let you know what we are currently working on and walk you through highlights from our 2020 roadmap in the January Release Webinar, Tuesday 14th January 13.00 - 14.00 CET.

To register, please follow this link:

The Inspira Team

Heads up

Short downtime scheduled 7th February 2020

Due to database maintenance, there will be a short period of downtime during the next update 7th February, between CET 22.00 and 06.00 the next morning. We will be reminding you through the [Inspira Status Page](#). We recommend subscribing to email notifications on this page, if you are not already doing so.

We apologise for any inconvenience.

We are ending support for older SEB versions in the February release

Support for the following versions will be *removed* on 7th February:

- Mac - SEB 2.1.3

- Windows - SEB 2.2.1, 2.2.2 and 2.2.3

Please upgrade to the latest version before 7th February.

New Marking Tool

For Marking 2.0 Beta participants

Our new Marking tool is in the final quality assurance stages and we plan to exit the closed beta next release.

If the Grading Beta option is enabled on a test, the test will now be opened in the new marking tool by default. This can be changed back to the original tool at any time by using the “Back to original tool” button:

The screenshot shows the 'Grades overview' workspace in the Inspira Assessment system. The interface includes a top navigation bar with 'Practice template', 'Jigling', and 'Planner'. A table displays candidate data with columns: ID, Committee, Attachment, Grades, Final grade, Grading deadline, Rounds, and Jagged analysis. A dropdown menu is open on the right, showing options: Language (English), Options, Help (?), Back to original tool (highlighted with a red arrow), Information to beta participants, Feedback to Inspira, and Report bug.

Bug fixes and improvements

- Support for images in SVG format in questions
- The Marks and Grades as CSV export previously only included one decimal in the marks. This has now been fixed so all decimals are included in the export
